

Dear Ladies and Gentlemen:

Please preserve the integrity of amateur radio by retaining Element

1. I do not agree with any dropping of the ridiculously easy 5wpm watered down code requirement for selfish reasons. I could live with this petitioner's proposal if I had to live with any on file, though.

People want something for nothing. Please lead by example. Make the ARRL's and the Manufacturers, and Prospective Hams earn their privileges like most of had to do. Thanks, Wayland Bradley k4ws
